Course Highlights

Internet Anonymity for Law Enforcement will help establish your own strategy for disappearing from public view. Students will learn to make communications private, internet connections anonymous, computers hardened, identity guarded, purchases secret, accounts secured, and home address hidden.

Who Should Attend

This class is designed for any investigator or detective. No technical background is required. Previous students have included investigators, detectives, supervisors, officers, and support staff.

Material Requirements

Students should bring a laptop with Internet capabilities.

Agenda

Day One

1. Basic Security Protocols
2. Configure web browsers for optimal security
3. Prepare anonymous communications for data removal techniques
4. Assess your current level of exposure through public resources
5. Conduct a complete self-background check to identify vulnerabilities
6. Properly secure all important online accounts

Day Two

1. Completely remove historic social network activity
2. Remove personal information from online data brokers
3. Properly secure your credit, SSN, and IRS information
4. Obtain credit cards, prepaid cards, and virtual cards in an alias name
5. Establish an alias for daily use, for covert use, or anonymous purchases
6. Obtain a completely anonymous cell phone and service plan

Instructor: M.A. Drew

M.A. Drew is a Detective for a Southern California Police Department where he is assigned to high profile cases that often require covert investigative skills. He investigates crimes involving narcotics, gangs, adult & child sex crimes, human trafficking, and Internet crimes. He is an 8 year veteran at his agency, and forever a proud United States Marine. First and foremost, Mr. Drew is a privacy and security advocate with a passion for teaching others. With extensive training in open source intelligence techniques, computer forensics, and cyber-security, he utilizes these skills to assist in criminal and private investigations of all types. Understanding the depth of information that is available online and the unique methods to harvest this data, has developed into a passion for finding ways to protect that same information or remove it completely. When Mr. Drew is not tracking criminals through cyberspace or teaching colleagues how to stay anonymous, he enjoys spending time with his daughter, a 5 year old black Labrador, whose name has been "redacted" for privacy.
