Register at
www.policetechnical.com

Course Highlights

While most of the public is accustomed to Google and common social media platforms such as Facebook or Twitter, Law Enforcement officials are interested in a side of the Internet that criminals are increasingly turning to: the dark web. Here, subjects are involved in hacking, file corruption, trafficking, counterfeit software, and the exchange of restricted goods.

Students who take this course will learn how to comprehend each level of the web, from the surface (Google) down to the "deep" or "dark" sections. The course also uncovers the criminal offenses and investigative techniques often associated with the dark web.

Who Should Attend

This class is designed for any investigator or detective. No technical background is required.

Material Requirements

Students should bring a laptop with Internet capabilities.

Agenda
